seShDocMeet – A True "So-Lo-Mo" Platform

seShDocMeet is a one-of-a-kind "**So**cial-**Lo**calized-**Mo**bile" platform

Social Media Integrated

Localized for each User

Mobile Enabled

Global Recognition

seShkool, a custom development based seShDOCMeet platform received plaudits in the International arena – GoMobile 2012, Kuala Lumpur, when it was bestowed "Certificate of Merit" for being the most Innovative Mobile Learning Initiative in Asia-Pacific region.

Frequently Asked Questions

1. **How is our product different to Webex and other similar tools?**

   The major difference between seShDOCMeet and other platforms are:

   - *Tools like webex are transactional in nature, facilitating only an adhoc interactive instance. seShDOCMeet enables the participants to form a collaborative community with membership rights. The users can engage in online as well as offline leveraging the Portal and Live conference room available in seShDOCMeet.*

2. **Can any other participant share or make changes to any documents that are being circulated by the person conducting a class/seminar?**
   - *The participants also can make changes to the document. It will be saved as an individual copy that can be accessed by the participant.*
   - *The base document shared and annotated by the Moderator will remain in its true form.*

3. **How does the pricing work and the model?**

   The different types of pricing and deployment models are as below:

Model	Pricing Model
On-site	✓ License Fee ✓ Annual Maintenance Fee

On-demand	✓ Setup Fee
	 ✓ Transaction Charges
	     o Per User
	     o Data Transfer
	     o Storage Space
	     o Conference Instances

4. **Where are the servers? Do we have a private cloud to securely host the application?**

   Our servers are hosted securely in farms with all necessary firewalls, anti-virus and anti-spam infrastructure. The access to each instance is limited by the credentials assigned to each user by the Administrator. The members have role-based access to information.
